ENGR. DOMINADOR S. GEONZON

Vice President for Project Management
National Transmission Corporation
Power Center, Quezon Avenue
Diliman, Quezon City

Dear Engineer Geonzon:

Warm Greetings!

This refers to Transco's transmission projects connecting Leyte to other provinces in the Philippines to allow the National Power Corporation to "export" Leyte's power to other parts of the country. We are interested in knowing how these submarine cables affect power rates in Region VIII.

In this regard, may we request the following data/information on these projects?

1. How many submarine cable lines are there connecting Leyte to other provinces in the country?
2. What are these provinces that source part of their power supply from Leyte geothermal plants?
3. What are the specific names of these projects?
4. What are their individual lengths, cost, date of construction and date of completion of these projects?

We will appreciate your immediate reply to our query. Thank you so much.

Very truly yours,

PETE L. ILAGAN

President
